The Bland bill provides for the free coinage of silver dollars of 412 1-2 grains each, and also that whenever France shall open her mints to the free coinage of silver at a ratio of 15 1-2 to 1, the weight of the United States dollar shall be reduced to 400 grains of chandral silver.

HILL'S SELF-MADE BOOM

MEMBERS OF THE HOUSE DISGUSTED WITH HIS PERSISTENT SOLICITATION.

standard silver.

Washington, Jan. 20 (Special).-The busiest man in Washington is David B. Hill. His duties as one of the Senators of the Empire State do not occupy his time or absorb his attention, for he knows little and cares less about legislation. All his thoughts are concentrated upon himself; all his energies are devoted to attempts to promote his own political fortunes. Information received here from private and trust worthy sources shows that Mr. Hill and his lientenants have been at work for weeks with greater zeal and dustry than ever, working up sentiment in his behalf. specially in the South, and that from Maryland to Texas this influence has been exerted and felt. Within the last week a Tribune correspondent has seen or heard read more that a score of letters from Den crats in the South which indicate that Hill has already made considerable headway among the younger and more active leaders who, a few months ago, were open and avowed supporters of Cleveland. So marked has been the change that some of Hill's

ardent partisans in Washington are ready to declare that he will have solid delegations from a number of the Southern States, and that Cleveland will not have one from that part of the country. Senator Hill's personal appeals and solicitations have become so per d importunate that some Democratic members of the House of Pepresentatives have been com-pelled to express their sense of disgust, but it is apparent to unprejudiced and careful observers that he is gaining adherents, despite the peculiar methods which he has adopted. He is as persistent as a book agent, fortifications at the east rn entrance to Long Island and according to some Democrats, he pursues about the | sound. respondent to-day, one of them said:
"Hill is in danger of overdoing the thing. He ap

pears to think that a nomination for the Presidency i thing to be obtained by buttonholing people and assuring them that he is a better Democrat, and would be a stronger candidate, than any other man. while I, of course, admit that we ought to select as a candidate the man who can poll the heaviest vote. want better evidence than his own assertion that he can do so. So far as Mr. Hill is concerned, I am decidedly inclined to believe that he is not so strong by many thousand votes in his own State as he was six months ago. It is true that he has won an apparent victory, but I greatly fear that there will be n strong reaction which will injure the party and perhaps cost us the electoral vote of the state, if he shall be placed at the head of the ticket.

"Nobody seems to know where he stands on any

of the great issues which divide the parties and upon which the Presidential battle must be fought. We all know where Mr. Cleveland stands, and while I do not him credit for sincerity and constancy of purpose, both as to that and the tariff. Now, I am not subsided that Mr. Hill's convictions in regard to either subject are firm or intelligent. He may be as sincere and carnest a tariff reformer as Mr. Cleveland, but there is a lurking suspicion in the minds of many bemocrate that he is not to be trusted. I have received sveril letters from Democrate of some prominence in my state in Mr. Hill's behalf, and they are so similar in tone and expression as to indicate that all of them were inspired from the same source. They certainly lack spontaneity. him credit for sincerity and constancy of purpose,

REPUBLIC PENSIONERS OF IMMIGRANTS.

Washington, Jan. 20.-Official correspondence be tween the Treasury Department and the Department of State, closing with a letter of January 19 from the Acting Secretary of the Trensury, has brought to put lie notice a new phase in the administration of the laws regulating immigration. Two immigrants from Great Britain, Charles Gittons and John O'Brien, were detained at the Immigrant Station, New York. are on the pension rolls of the British War Office O'Brien was returned to Liverpool, but the British Minister at Washington Interposed in behalf of Charles Olibbons. While finally consenting to permit Gib-bons to land, the Acting Secretary of the Treasury calls attention to the fact that it appears to be the established practice of the British War Office to commute the pensions of invalids and disabled pension ers on the condition that they immediately emigrate to some other country-usually to the United States that this lump sum is not paid to the commuter in Great Britain, but is forwarded to the British Cor at New-York or other port of arrival, and paid to him on his arrival, the unavoidable inference being that the privilege of commutation, whether so intended 15 the British Government or not, serves as an inducment to emigrate from the British Dominious. At tention is further called to the fact that before the e pensioners are permitted to commute their pensions they are required to sign a document waiving all claim the pension rolls, and that the sum received i seldom sufficient to preserve the immigrant from be-coming a mable charge for any considerable length of time, while they are usually mashle to carn a liveli-hood. The Acting Secretary closes his letter by saying that the permission to the Gibbons family to land must not.

FOR THE EIG BILLIARD MATCH.

Lovers of scientific billiard playing are looking forward to the Schnefer-Slosson match at the Lenox Lyceum to-morrow night with a great deal of interest The match will be for \$1,000 a side, and lively betting is being indulged in by the friends of both men. The betting at present is about even, Scharfer's friends standing loyally by him in spite of his recent defent Slosson. Both men have done remarkably well in practice, and it is a revelation to see the men in their preliminary work. Schnefer plays with spasmodic, jerky, lightning-like rapidity, making apparently imt effort. Slosson is more pain-taking and e and calculates the result of each stroke before the cue touches the ball. Sposson's work is excellent, and his bractice seems to before that he has improved wonderfully over the Slosson of two years ago. His delicacy of tuch is remarkable, and he makes carron after carron without moving the balls more than a few inches. Slosson's best run to date in his practice work is 324. Schnefer's best run is 336.

GUTTENBURG PEOPLE GIVE THEMSELVES UP. Gottfr.ed Welbaum, president of the Hudson County Jockey Club; J. N. Crusius, its treasurer, and S. White-head, the secretary, were prisoners yesterday before Justice Lockwood, of Jersey City. The three men entered the office of the justice and said that they understood that warrants for their arrest had been issued, and they desired to rants for their arrest and new issues admitted them to \$300 bail each for the action of the Grand Jury. Peter Wilkins came surety for all. Then the men re-entered their couch

Soon afterward J. C. Carr, another of the "Big Four," called on the justice and procured copies of several com-plaints that have been made against the racetrack men, and then he went to the law office of Wallis, Edwards & msted and held a consultation. Justice Lockwood was by pretty much all yest-rday in preparing warrants for the arrests, and he said he would continue to issue them as long as the jockey club violated the law, racing vesterday. The Guttenburg men sale as long as the locarion reaches restored with the reason the reaches restored with the look look look over the track was because the skites and not hoome over the track was because the ground was frozen too hard. People who do not like Guttenburg declared that it was because the racetrack men wanted the day to p pure for a continuation of the fight against the Law and Order League.

SLEIGHS FLITTING THROUGH THE PARK. MANY PEOPLE ENJOYING THE COLD WEATHER-PROSPECTS FOR TO-DAY. The horse was in his glory yesterday. Sniffing with

keen delight the winter air, tossing their noble head-and wind swept manes, with necks promity arched and muscles playing gradually, they dashed along, the soft thunder of their flying hoofs mingling and making cheery music with the chiming and the trilling of the bells which they hore. Though the snowfall o day was not deep, it made much better sleighing than the previous snow storms, for the glittering rivets of the frust hardened and froze the white deposit, and made the read a thing of delight. In the Fark the sleighing was better yesterday than at any time this senson, and for the first time the cutter flew over the lev stretches of the winding drives without cranching through the snow and striking the earth beneath. sequence, there were more sleights on the drives and the streets leading to them than were seen before at any time during the season. For the first time since winter began, the Park was really filled with sleighing parties. They came in, not singly, but four and five abreast, and everywhere, wherever a gap in the wall of snew covered trees gave one a glimpse of the drives there flashed the sheen of glittering harness, the colors of plumes and fur, and the bright thits of hoods and or plannes and far, and the dright thus of noods and wraps. The west drive was the favorite, but the east and centre drives were also well filled. It was noticeable that yesterday there were many cutters. To New Yorkers, made sensitive to cold by the mid

weather which prevailed till now, the sudden drop fit temperature made the cold unpleasantly bitter at first, but niter the first sharp tingle and burning in ears, nose and extremities had been conquered, it become delightful to breast the wind and to breathe the bracing air. The weather showed the fitful temper of the outh from its most favorable side, and New York was made love y and beautiful a frozen, white city, framed round by green and stormswept waters, with a sky that had no speck of cloud to mar its perfect splendor

HILARIOUS ROSTON BUSINESS MEN.

FUN AT THE OPENING OF THE NEW CHAMBER OF COMMERCE. Boston, Jan. 20 (Special).-The new Chamber of

imerce Building is situated at the junction of India st. and Central Wharf, close to the water-front, on land given to the Chamber by Henry M. Whitney, president of the West End Railway Company. The building is seven stories high and is built of pinic-gray granite from quarries near Worcester. The board room has a space of 4,300 square feet. The members of the Chamber of Commerce began the exercises which are to end in the dedication of their new building with a minstrel show, beginning at 2 o'clock this afternoon. Shortly after 1 o'clock a crowd of members and invited friends took up their stand outside the door of the Chamber and made life lively till they were admitted. Once within the Chamber they dived for the most advantageous positions, and when these were gone climbed up and sat upon the window-sills and blackboards. A temporary stage with curtains had been erected at the further end of the rotunda. Programmes announcing the "Farewell Entertainment of the Boston Chamber of Commerce The aire " had been distributed, and their various local hibrity. The Germania band furnished the necessary orchestra. They had just begun the overture when four musicians from the Sunny Land of Olives were ushered in, and through some mistake were set to playing different pieces. The effect upon the audience was noticeable. Then the curtain rose and the programme was presented with no interruption. The

This evening there was a promenade concert and reception in the new building. To-morrow the building will be dedicated, and in the evening a banquet will be given at the Vendome, at which representatives will be present from the Boards of Trade of New-York, Chicago and other cities.
